- Screen can be extended 6" from wall.

- Install our mounting bracket in wall brackets. determine the height and location of the screen to be mounted and mark.Measure the distance you need.Transfer the measurements to the wall and attach the wall brackets securely to the wall at those points.

- Hang screen on mounting bracket. Then fix our screen on the mounting bracket and then adjust the screen to the right position by moving screen through the mounting bracket to get a perfect position you want (see screen manual instruction).

- These brackets are universal and can be used for right or left side.
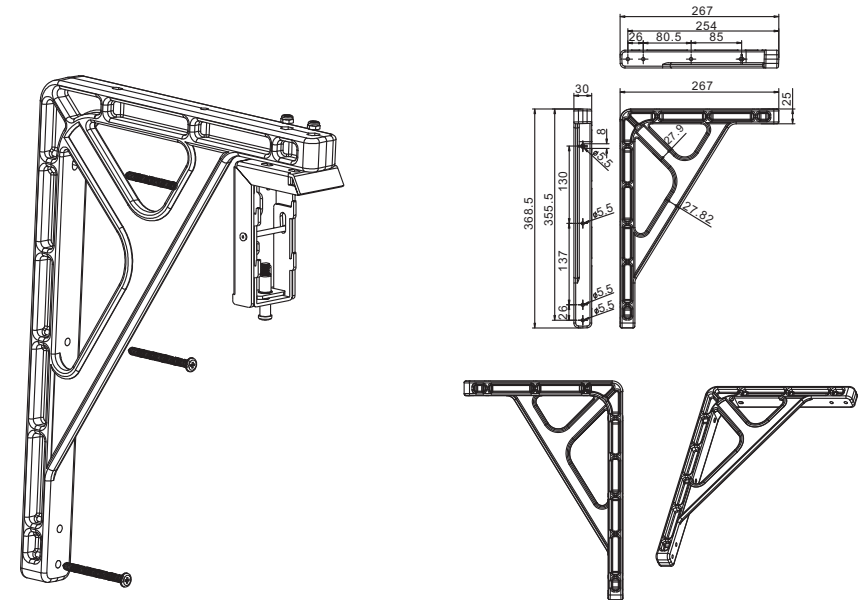

- Screen can be extended 10"(14") from wall.
