FLAT 6

FLAT 6+

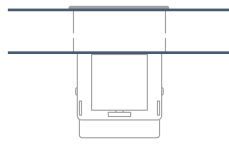

INSTALLATION

Two installation options

FLUSH MOUNT

Rounded corners of this box with R4 radius are perfect for in-table installation when the box is aligned with the table top.

SURFACE MOUNT

Stylish hand brushed sharp corners only 1,5 mm high make the box look more subtle. Box is supposed to be installed on the surface of the table top.

Unique desk-mount system adaptable to table tops 16 to 48 mm thick.

Adjustable bottom side covers provide two options of cable outlet for neat and safe cable management.

Colours

3 top quality colours, scratch resistant 3-layer paint

MODULARITY

Choose your CHASSIS

Each chassis has 4 or 6 slots to hold the power module and up to 4 connection modules of your choice. It comes in two sizes (holding 4/6 slots) each available in standard and "+" version. Plus version is 20mm deeper and is developed for signal component and control system integration.

Choose your POWER MODULE

Power Module consists of sockets and optionally charging USBs. It is available in 2 to 4 slot versions.

Choose your CONNECTION MODULES

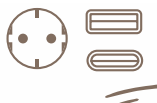

Each FLAT has up to four slots for 45mm connection modules. Wide range of AV/IT connectors are available in various combinations.

If you are not decided, use the blank and once you know what you need we will deliver necessary connection module.

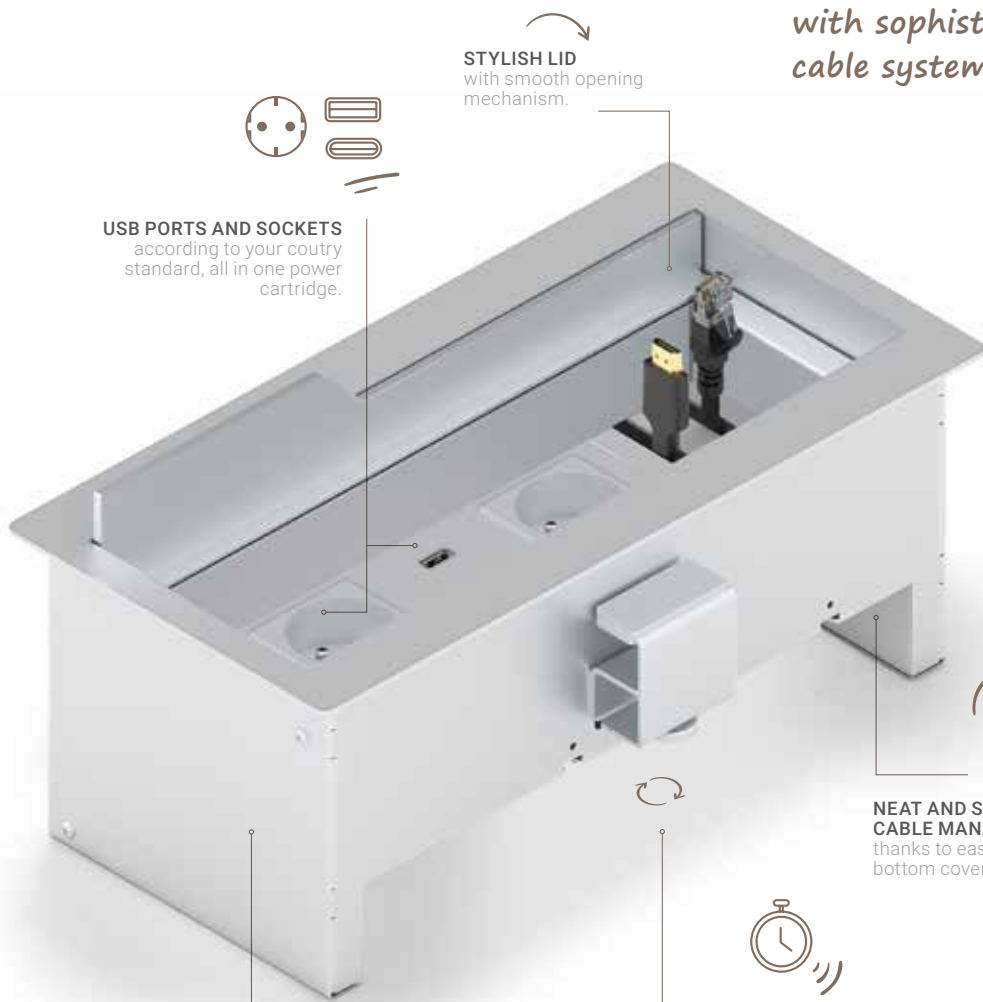

UNI

The most advanced interconnection box with sophisticated cable system.

USB PORTS AND SOCKETS
according to your country standard, all in one power cartridge.

STYLISH LID
with smooth opening mechanism.

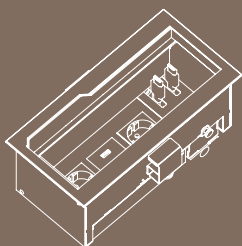

NEAT AND SAFE CABLE MANAGEMENT
thanks to easy sliding bottom cover.

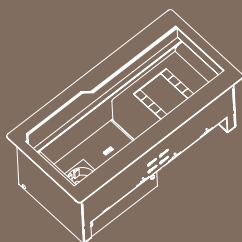

EASY AND QUICK INSTALLATION
thanks to unique desk mount system.

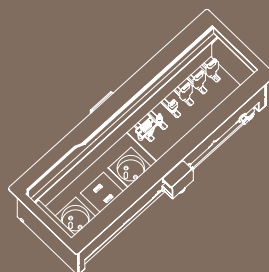

LACQUERED STAINLESS STEEL CHASSIS
makes box sustainable and durable.

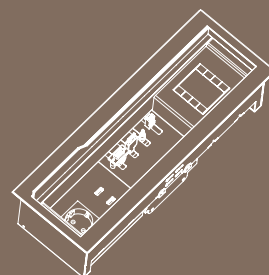

UNI 4

UNI 4+

UNI 6

UNI 6+

INSTALLATION

UNI can remain closed while being used thanks to a well designed lid.

MODULARITY

Choose your CHASSIS

Each chassis holds the cartridge. It comes in two sizes (holding 4/6 slots) each available in standard and "+" version. Plus version is 20mm deeper and is developed for signal component and control system integration.

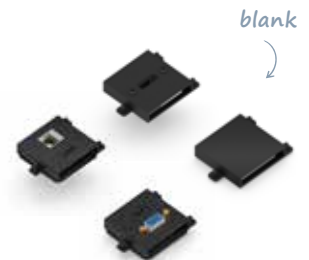

Choose your CARTRIDGE

NEO cartridge consists of power section with power sockets and optionally charging USBs and the rest of the cartridge holds up to 4 slots for connection modules.

Choose your CONNECTION MODULES

Each NEO has up to four slots for 45mm connection modules. Wide range of AV/IT connectors are available in various combinations.

If you are not decided, use the blank and once you know what you need we will deliver necessary connection module.

Modular system for better flexibility

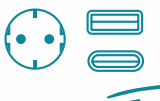

The modular design means that the user's needs can be exactly tailored to each interconnect product on offer. It means that it is possible to change each part of interconnection box in the future. Everything depends on customer's requirement.

MINI

VERSATILE CONNECTIVITY AND MODULARITY
with wide range of modules.

USB PORTS AND SOCKETS
according to your country standard, all in one power module.

POSSIBLE COLOUR CUSTOMIZATION
of inlays to embellish the smart spaces.

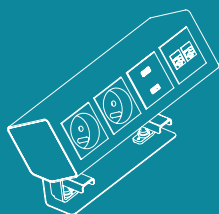

LACQUERED STAINLESS STEEL CHASSIS
makes box sustainable and durable.

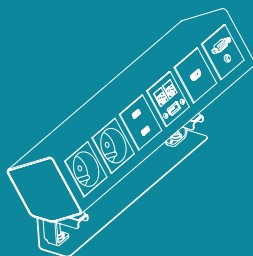

QUICK INSTALLATION WITH COVER BACK
for side mount and for hiding of cables.

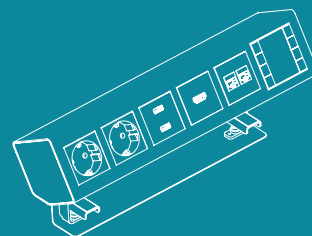

The flexible interconnection box for full connectivity in a few seconds.

MINI 4

MINI 6

MINI 6+

INSTALLATION

For variable meeting and training rooms

ON-TABLE INSTALLATION

Since MINI is not drilled to the table top, it can be simply moved to any other place.

Timeless design with customisable inlays inspired by a melted icecube.

SIDE MOUNT SYSTEM

Using the special clip system MINI can be safely placed on the side of the table.

MODULARITY

Choose your CHASSIS

Each chassis has 4 or 6 slots to hold the power module and up to 4 connection modules of your choice. It comes in two sizes (holding 4/6 slots) each available in standard and "+" version. Plus version is 20mm deeper and is developed for signal component and control system integration.

INTEGRATION

Integrate your SIGNAL COMPONENTS or CONTROL SYSTEM

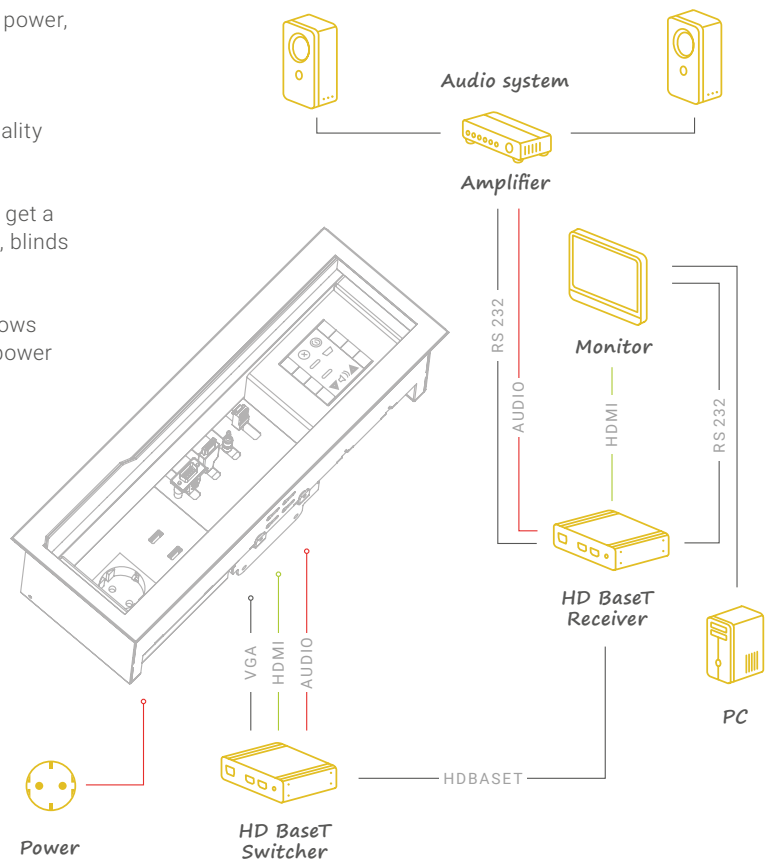

The contemporary use of digital media in conferences and meetings requires a flexible all-in-one solution for power, network and A/V connections.

PANCONNECT with active electronics combines innovative technology with usability and a high-quality design.

By integrating a control system keypad to UNI you get a full control over the meeting room including lights, blinds and the presentations equipment.

Using a signal switcher with HDBaseT output narrows down number of outcoming cables to only one power cable and one signal cable.

Integrate your system
