

Thank you for purchasing FX-P320

The optical HDMI pigtail extender with HDCP support extends HDMI signals up to 300m using single strand multi-mode optical fiber cable. It supports resolutions up to FullHD (1920x1080) and WUXGA (1920x1200).

Package Contents

Please make sure all of the following items are included in the package:

- 1 FX-P320 Transmitter & Receiver
- 2 +5V DC Power supply x 2pcs
- 3 User Guide

If any of the above items are missing, please contact your supplier for support.

Note: Package content may differ if you have placed a special order or placed order from anywhere other than PureLink GmbH. PureLink GmbH reserves the right to make changes without further notice to a product described herein to improve reliability, design, packaging or function.

Installation

Installation Steps:

1. Connect product transmitter to the HDMI port on your source device.
2. Connect product receiver to the HDMI port on your digital display device.
3. Connect Multi-mode SC type 1 Channel standard fiber-optic cable between transmitter and receiver.

4. Connect power adapter to the receiver which has been provided. *Connection of the power adapter is optional (in case source device cannot supply full voltage from HDMI alone)
5. The Green LED will appear on the transmitter and receiver, after all the product connections are completed.

Note: The Transmitter and the Receiver modules must be connected to the included power supplies for proper operation. Transmitter module must be powered on first.

Application

Trouble shooting

Screen is not displayed

- Check if the source device power is on
- Check if connections to the source and display device are correct
- Turn the source device power off and on again

Noise is shown on the screen

- Check the HDMI connection
- Check the display resolution

If the malfunction is not fixed by the above measures, please contact your reseller.

NOTE: If you are still experiencing problems, It may be necessary to clean the module connector or SC fiber cable. Around 80% of connection issues with Fiber optic systems are due to dirty connectors - for more information see the Purelink fiber cleaning guide on our website: http://www.purelink.de/fileadmin/purelink/media/sonstige/PureLink_Fiber_CleaningInstructions.pdf
