2x 27"
4K Screen

The Public Package

When the workspace is in a public area i.e. a hotel lobby, or it serves multiple users such as a hot-desk scenario, then it is important that the tech is hidden and fixed. The Public Package centres around the PT-HUB-100, a fixed installed docking solution that exceeds the standard required for consumer IT grade products, and instead meets ProAV quality standards. Up to 4K dual monitor support and when used with single wide screen display, it is fully compatible with Mac as well as Windows. For extra peace of mind the HDMI connection is secured using ULS.

Fixed Install USB-C Dock

PT-HUB-100

Hiding under the desk in this package is the worlds first ProAV dual 4K USB-C docking station.

Designed to have the customer facing connections on one side, it can be mounted under the desk or hidden from the user entirely - enabling maximum flexibility and security to any professional installation.

ProAV Mounting

The PT-HUB-100 offers pro mounting unlike most dockin stations on the market.

Full Feature USB-C

100W PD, 10G data, 4K video and Gigabit Ethernet in a Pro AV package.
